PRESS RELEASE

LAVOCE INCREASES 1" EXIT COMPRESSION DRIVER RANGE
Polyester diaphragm and Titanium diaphragm versions added

POTENZA PICENA, April 2017 – Lavoce Italiana, the transducer company with a heritage of over 30 years designing and manufacturing loudspeaker components, has introduced six new Polyester diaphragm 1" exit compression drivers and two Titanium diaphragm 1" exit compression drivers, to its already successful range of PEEK (High Temperature Polymer) diaphragm models.

Fully optimised using FEM techniques for linear, smooth and extended frequency responses with low distortion and high efficiency:

- DF10.10LM (15W) and DF10.14LM (25W) are cost effective Ferrite magnet solutions using Polyester diaphragms with round CCA wire 1" and 1.4" voice coils.
- DF10.14M (25W), DN10.14M (25W), DF10.17M (55W) and DN10.17M (50W) are Ferrite and Neo magnet designs using Polyester diaphragms with Edgewound CCA 1.4" and 1.7" voice coils.
- DF10.17T (60W) and DN10.17T (55W) are Ferrite and Neo magnet designs using Titanium diaphragms with Edgewound CCA 1.7" voice coils.

Pierpaolo De Minicis, Lavoce Account Manager, added, 'These new models create a really strong and exciting range of 1" exit compression drivers, and clearly demonstrates our commitment to offer our OEM and distribution customers elegant HF solutions that deliver that critical balance of performance, consistency and price.'
