NAMM PRESS RELEASE

LAVOCE EXPANDS NEXT GENERATION 1" EXIT COMPRESSION DRIVERS WITH LIGHTWEIGHT NEODYMIUM MAGNET DESIGNS

POTENZA PICENA, January 2020 – Lavoce Italiana, the transducer company with a heritage of over 30 years designing and manufacturing professional loudspeaker transducers, are proud to be launching three new 'Next Generation' neodymium magnet 1" exit compression drivers at NAMM 2020, following the success of the ferrite models released last year.

DN10.142, DN10.172M and DN10.172K offer compact and lightweight solutions for system designers that are looking for low distortion, no-compromise acoustic performance to 20kHz and that critical price-performance ratio which is so important to in today's competitive pro audio market.

DN10.142 is a 50W AES neodymium magnet 1" exit compression driver with a 1.4" voice coil, 107dB sensitivity, High temperature polymer diaphragm and surround and has a useful 60mm diameter, making it perfect for high performance compact 2way systems and line arrays.

The 1.75" voice coil neodymium designs complete their 'Next Generation' models this year with the DN10.172M using a vented Polyester diaphragm and surround, rated at 50W AES, 109 dB sensitivity, and DN10.172K using a vented Polyimide diaphragm and surround, rated at 55W AES, 110dB sensitivity, both 85mm diameter and suiting premium performance 2 or 3way systems or line array.

Kevin Shove, International Sales Director, 'It is such an exciting time for Lavoce right now following the research and engineering investments we have made in compression drivers over the last few years. Together with our comprehensive range of steel and die-cast basket LF woofers, midranges and subwoofers, we now also have a truly excellent compression driver line-up to meet the demands of every application and need of our customers.'
