NAMM 'BELIEVE IN MUSIC' PRESS RELEASE

LAVOCE INTRODUCES FOUR NEW 'SCREW-ON' FITTING 1" EXIT COMPRESSION DRIVERS

POTENZA PICENA, January 2020 – Lavoce Italiana, the transducer company with a heritage of over 30 years designing and manufacturing professional loudspeaker transducers, are introducing four new 'Screw-on' fitting compression drivers to their 'Next Generation' range of 1" exit HF products at Believe in Music.

DF10.101LS 8ohm	**DF10.142LKS 8ohm**	**DF10.172KS 8ohm**	**DN10.172KS 8ohm**

There are three Ferrite magnet options to choose from:

- DF10.101LS (20W AES, 1" VC, 107dB, High temperature Polymer diaphragm)
- DF10.142LKS (35W AES, 1.4" VC, 106dB, Polyimide diaphragm)
- DF10.172KS (60W AES, 1.7" VC, 108.5dB, Polyimide diaphragm)

And one lightweight (0.9kg) Neodymium magnet option to choose from:

- DN10.172KS (55W AES, 1.7" VC, 110dB, Polyimide diaphragm).

Each driver has been developed using Lavoce's Next Generation design approach to offer a useful range of cost-effective HF solutions for any moulded horn or cabinet projects requiring a high performance and robust 'Screw-on' fitting device, or to simply refresh tired HF units in existing cabinets. Every aspect of their design has been carefully optimised to offer a no-compromise acoustic performance, with high power handling and a very linear frequency trend, continuing Lavoce's trend of offering a wide range of HF devices with an enviable and cutting-edge price-performance ratio.

Kevin Shove, International Sales Director, 'As our customers are forced to adapt to the devastating impact COVID has had on our industry, especially the install and touring segments, many are now investing in the development of more portable/DJ PA type products, so we are fortunate to be able to support their plans with 'Screw-on' versions of our most successful Next Generation 1" exit compression driver design, all of which will be available through our distributor and dealer network.'
